

## Ideas for Home...

Learn the **121 multiplication facts** using a strategies-based approach.

### Card Game Ideas & Tips:

Use your login to get onto [mfacts121.com](http://mfacts121.com)

- Print *off* the level 'playing cards' you are working on, using some coloured paper. Cut them up.
- Play '*snap*' with the questions and the answers.
- Play '*memory*' or '*concentration*' with the questions and answers.
- Shuffle the cards and then see how fast you can *find all the pairs*- time yourself.
- Pick out some of your *favourite facts* and *explain your strategies* to your parents.
- Pick out the facts which are *still difficult* for you. Investigate some strategies. Practise these facts *the most*!

\*The ultimate aim is for students to be fluent, fast and efficient when solving the 121 Multiplication Facts up to  $10 \times 10$ .

\*Investing just a few minutes on a regular basis to *help your child* with learning their Multiplication Facts will make a HUGE difference!

*Help them grow their MATHS BRAIN !!*
